Typically, we divide feedback loops into two main types: positive feedback loops, in which a change in a given direction causes additional change in the same direction. For example, an increase in the concentration of a substance causes feedback that produces continued increases in concentration. negative

However, radiographic study of the human body is primarily a study of the anatomy of the various systems, with less emphasis on the physiology.

Consequently, anatomy of the human system is emphasized in this radiographic anatomy and positioning textbook. Atoms Mole cule Ce II
